iConcepts™ eDocNavigator™

Unique Features

- On-Line coding of electronic documents (e.g., relevance and privilege coding)
- Visual presentation and navigation (Browse) of original directory structure (including Outlook PST files)
- Sorting and searching of metadata
- In addition to preserving native format, eDocNavigator™ converts all electronic documents to PDF for coding and viewing of documents not viewable by the end-user in native format.
- Multiple search mechanisms
 - ⇒ Content search
 - ⇒ SQL query
- Document basketing system
- Flexible reporting to paper or Excel
- Secure data repository
- Chain of custody processes
- Cost effective solution

Description

eDocNavigator™ - Litigation Support Tool

Industry statistics indicate at least 90% of all documents are created electronically and that 80% or more of all documents only exist in electronic format. Traditional document management techniques of printing to paper for review and classification are growing impractical and wasteful.

eDocNavigator™ is a Web-based solution that is designed to permit review, culling, and coding of electronic documents in their native format. PST file support (Outlook) is also included. eDocNavigator™ responds to the document management needs of law firms and corporate law departments.

The software permits traditional full text and field searching as well as browsing via the original native directory structure. Once the document population has been effectively coded and /or culled, relevant documents can either be managed through eDocNavigator™ or downloaded in native format for use in other litigation support document management solutions (e.g. Summation and Concordance).

The screenshot displays the eDocNavigator web interface. At the top, there are navigation tabs for 'My Cases', 'Search', 'Browse', 'My Information', 'My Notes', 'My Documents', and 'Log out'. Below this, a search bar contains the text 'case' and shows 'Matches: 91'. A table of search results is visible with columns for Name, Author, Date, Privileged, Witnesses, and Issues. Below the search results, there is a 'Case Documents' section with a tree view of folders and a list of documents with their sizes and dates.
